Summary

Information Technology Management student (UADE) passionate about **Business Value Realization** and bridging the gap between IT, Finance, and Business Operations.

Strong analytical background combining cross-functional operational experience in retail with practical data-tracking tools (**Excel, Python scripting, SQL**).

Looking to leverage my data-driven mindset and communication skills as an IT Trainee at Kimberly-Clark to track KPIs, facilitate collaboration, and support technology initiatives that deliver measurable business outcomes.

Education

In Progress	Universidad Argentina de la Empresa (UADE) , BSc in Information Technology Management - Current GPA: 7.6 Focus on IT Operating Models, Business Strategy, and Data Management. - Developed leadership and teamwork skills through active participation in academic cross-functional projects.	Buenos Aires, Argentina Mar 2024 – Present
Graduated	Colegio Eccleston , High School Diploma in Economics & Administration Final GPA: 9.3 Strong foundation in economics and financial reporting.	Buenos Aires, Argentina Mar 2018 – Dec 2023

Experience

Grido , Operations & Data Tracking Analyst Performance & Financial Tracking: Conduct daily cash reconciliation, financial reporting, and value tracking using internal ERPs and Excel, ensuring data accuracy. Cross-Functional Collaboration: Act as a bridge between frontline operations and inventory management, translating operational needs into actionable logistics requests. Data-Driven Problem Solving: Manage critical stock availability by analyzing daily consumption metrics and preparing follow-up actions under high-pressure scenarios.	Buenos Aires, Argentina Jan 2024 – Present
Freelance , Digital Project Coordinator Facilitated communication with clients to translate their business objectives into concrete digital and multimedia solutions.	Remote Jan 2021 – Dec 2023

Projects

Franchise Operations & Financial Dashboard Business management tool developed with AI assistance. - Currently developing a comprehensive web dashboard using Claude Code (Generative AI) to streamline retail franchise operations. - Integrating cross-functional modules for employee shift scheduling, real-time stock management, and daily income tracking. - Designed to translate raw operational data into actionable business metrics, directly aligning IT solutions with financial efficiency and KPI tracking.	2026
Automated KPI & Data Tracking Pipeline Data-driven reporting initiative. - Developed an automated tracking system using Python to extract, clean, and analyze unstructured market data from external APIs. - Utilized data reporting concepts to translate raw technical metrics into understandable business insights.	2025

Certifications

Red Hat System Administration I (RH124) View Official Credential (Credly) 🔗 - Analytical and structured approach to IT systems.	2025
Claude Code in Action (AI for Productivity)	2026
